

Argentina Jobs Expertini®

Backend Developer

[Apply Now](#)

Company: CONEXIONHR

Location: Argentina

Category: computer-and-mathematical

About us:

Our focus is empowerment – giving customers the tools to save money, invest their cash, and most importantly learn the oft-overwhelming world of personal finance.

The company's product suite contains: financial quizzes with memes for those of all ages, a stock brokerage platform, unique savings tools like auto-save and round ups, a teen debit card, and even creative ways for kids to earn cash through allowance and chores.

Responsibilities:

- Design solutions, write code based on user stories and fix bugs.
- Be responsible for analysis of existing components including technical refinement, performance diagnosis and troubleshooting.
- Participate in building a middleware to simplify how bank institutions plug-in to the company's environment.
- Have to be able to follow best practices and implement design patterns.
- Need strong and effective interpersonal and communication skills and the ability to interact professionally with other members of the Dev team, the QA team and the DevOps team.
- Be able to take ownership and bring changes to the table.

Qualifications:

- 5-6 years of experience working on .NET technologies (C#, WebAPI, Entity Framework, NUnit)
- 3 years of experience on .NET Core.

- Strong understanding of RESTful concepts, Dependency Injection, Unit Tests and TDD.
- Capable of designing relational database schemas (MSSQL, MySQL) and experience in T-SQL.
- Experience working with HangFire or similar background job frameworks, and with MQ components.
- Experience integrating with 3rd party providers (using REST, GraphQL, SOAP or similar)
- Experience working with static analysis and code smells frameworks (SonarQube, SonarLint, or similar)
- Experience working with different security and encryption libraries (JWT, AES, BlowFish, MD5 or similar)
- Experience working with distributed cache services (Redis, ElasticSearch or similar)
- Desired: experience in planning and executing the refactoring of a monolithic backend into a microservices architecture, including queues and message brokers (RabbitMQ, AWS SQS or similar)
- Desired: experience working with different AWS services such as ElasticBeanstalk, Lambda, API Gateway.
- Desired: experience in NoSQL databases.
