Company: KITRUM

Location: Argentina

Category: computer-and-mathematical

We know people

Who we are?

KITRUM is a one-stop custom software development company headquartered in sunny Florida with development centers in Ukraine, Kazakhstan, Israel, and Poland. With a pool of 300+ top-notch engineering resources, we help CxOs of VC-backed startups and fast-growing tech companies in the US, EU and Australia to custom build software engineering teams packed with top-tier talent.

We realize that one of the most crucial things for developers — adequate client and fascinating projects. So we qualify our clients to make sure that they:

— have an idea that they believe will make the world a better place;

— think long-term and looking for a trusted-tech partner;

— want to rely on and avoid micromanaging;

— are not f$%$ing jackasses :-)

Follow our team on Instagram to know more about our daily life

We adore making new friends on the board!

The Role

Your responsibilities will include:

Manage data quality and integrity

Assist with building tools and technology to ensure that downstream customers can have faith in the data they're consuming

Cross-functional work with the Data Science or Content Engineering teams to troubleshoot, process, or optimize business-critical pipelines

Work with Core Platform to implement better processing jobs for scaling the consumption of streaming data sets

Ideal Profile

5+ years of experience in data engineering creating or managing end-to-end data pipelines on large complex datasets.

Experience in developing scalable software using big data technologies (e.g. Hadoop, Spark, Hive, Flink, Samza, Storm, Elasticsearch, Druid, Cassandra, etc).

Expertise in Scala

Fluency with at least one dialect of SQL

Level of English: Upper-Intermediate

Experience with Streaming platforms, typically based around Kafka

Strong grasp of AWS data platform services and their strengths/weaknesses

Strong experience using Jira, Slack, JetBrains IDEs, Git, GitLab, GitHub, Docker, Jenkins, Terraform

Experience using DataBricks

What's on Offer?

Work within a company with a solid track record of success

Flexible working options

Great work environment

High compensation according to your technical skills

Democratic management style & friendly environment

Professional and personal growth
