

Cloud Network & Security Engineer

[Apply Now](#)

Company: LatamCent

Location: Buenos Aires

Category: computer-and-mathematical

Overview:

Play a role in deploying cutting-edge infrastructure and automation while driving partnerships with security (cyber, STS, on-prem security), cloud engineering, and application development teams. Use your skills, experience, and talents to be a part of groundbreaking thinking and visionary goals.

As a Cloud Network and Security Engineer, your role will include:

Responsibilities:

- Implementation and support of next-generation cloud firewall features and capabilities

- Understand and deploy public cloud network architecture (Azure, AWS, GCP, etc.)

- Maintain, deploy, upgrade, and troubleshoot cloud network and security infrastructure solutions, including hybrid cloud connectivity, firewalls, load balancers, Site-to-Site and remote client VPN, Intrusion prevention and detection systems, etc.

- Collaborate with security and infrastructure teams to implement consistent technical solutions and support processes.

- Assist with on-call support as needed.

Primary Qualifications:

- BA/BS or equivalent experience

Minimum three years of total work experience

Minimum 1-year work experience with public cloud hosting and support (Azure, AWS, GCP, etc.)

At least one certification in one of the big three CSPs: Azure, AWS, GCP

Knowledge of networking and security support in an Enterprise Infrastructure and public cloud space

Experience with firewall configuration, implementation, and troubleshooting

Maintains technical knowledge within areas of expertise

Stays current with new and evolving technologies via formal training and self-directed education

English language proficiency

Preferred

Cloud certifications in either Microsoft Azure, Amazon AWS, Alibaba, or Google Cloud Platform

Experience with multiple Cloud Service Provider networks; Microsoft Azure, Amazon AWS, Alibaba, or Google Cloud Platform network implementation and support

Experience with network security and security operations, including but not limited to cloud-native firewalls, cloud-native security services, Check Point and Palo Alto firewalls, cloud-native load balancers, F5 load balancers, Unified Threat Management firewalls and IPS

Experience with PowerShell, Postman, Cloud Formation Template, and automating security processes or configuration in the public cloud is a plus.
