Position Summary:

- Performs cost estimating, analysis, and control activities, as directed
- Reports to and receive technical and operational supervision from designated supervisory personnel.
- Provides technical direction to assigned personnel, when delegated.
- Maintains relationships with project personnel, particularly with individual discipline group leaders and engineers.

Essential Job Duties:

Assists in developing and implementing requirements for cost recording, reporting, and analyzing standards, programs, and reports.

Assists in preparing cost data for projects, proposals and contract negotiations.

Scope change management.

Determines scope definition requirements for a discipline or other specialty and works with Engineering and other sources to coordinate the production of required data to conform to the overall estimate preparation plan.

Develops quantity takeoffs for a discipline or specialty using defined documents or undefined scope assumptions. Verifies quantities provided by others.

Develops and applies unit rates (cost and jobhours) to quantity takeoffs and to otherwise developed quantities within a discipline or other specialty.

Prepares specific budgets in accordance with prescribed standards and procedures.

Prepare and coordinate cost reports.

Collects and classifies cost engineering data.

Performs data analysis and development.

Performs any other duties as directed by the Project Manager / Supervisor / Manager

Qualifications and Skills:

Knowledge in capital cost and services cost.

Knowledge of scope change management.

Intermediate level of knowledge of engineering, procurement, contracts, construction, and startup work processes.

Proficiency in using multiple discipline-specific software applications.

Demonstrated skill in identifying, analyzing, and providing innovative solutions to cost problems.

Knowledge of financial reporting systems and controller account codes, and understanding of Controller instructions, which impact Project Controls (including Project Financial Status Reports and Earned Revenue Determination Data).

Bachelor's degree in Engineering, Construction Management, or related field of study and a minimum of 7-10 years of relevant experience in related industry

Knowledge in the use of computers and several basic software applications such as Excel, Word and PowerPoint for executing work processes

Skilled in oral and written communication.

Strong communication, leadership and organization skills.

Cost engineering/project management certification preferred. If no current certification, must be eligible to attain certification within one year of employment.

Physical Requirements:

Work is normally performed in a typical interior/office work environment.

Work involves sitting and standing for prolonged periods of time.

Work may involve walking, climbing on construction sites

Work may involve ability to travel up to 25%
