## Data Engineer - OP0964-00

[Apply Now](#)

Company: Dev.Pro

Location: Argentina

Category: computer-and-mathematical

### Data Engineer – OP0964-00

Are you in Argentina, Brazil, Colombia, Chile, or Costa Rica? Join us as we actively recruit in these locations, offering a comfortable remote environment. Submit your CV in English, and we'll get back to you!

We invite a skilled Data Engineer to join a US/UAE-based Fintech project — a digital asset management platform integrated with both fiat and cryptocurrency providers. We build an integration solution for a broad list of stakeholders, from investment banks to regulatory authorities and regular investors, targeting the US, UAE, and other markets. Our current goal is to implement an infrastructure for data processing, analysis, reporting, integrations, and machine learning model deployment.

#### What's in it for you:

Work with a modern and diverse tech stack (Python, GCP, Kubernetes, Apigee, Pub/Sub, BigQuery)

Be involved in design, implementation, testing and maintaining a data platform

Contribute to a worldwide innovative fintech project; grow your expertise in Fintech domain with Big Data

#### Is that you?

3+ years` experience on a Data Engineer's role

Practical experience in building data pipelines and data warehousing

Hands-on experience with database technologies (e.g., SQL and MongoDB)

Practical experience Google Cloud Platform (e.g., Dataproc, Bigtable, BigQuery, Cloud SQL, Pub/Sub, Cloud Run, Cloud Functions)

Technical expertise with data technologies and/or machine learning techniques

Experience in Python programming

Ability to write reusable code components

Great numeracy and analytical skills

Upper-Intermediate+ English level

**Desirable:**

Hands-on experience with Apache Beam, Spark, or other ETL tools

Familiarity with database migration tools (such as Alembic), automated build and deploy tools

Solid understanding of the blockchain system mechanism

Degree in Computer Science, IT, or a similar field

**Key responsibilities and your contribution**

For this role, you'll need to be both an independent decision-maker and a reliable team player, highly functional and capable of handling complex tasks with optimal efficiency. Apart from having strong knowledge across various technical domains, you'll need advanced communication skills to collaborate with other teams and quickly deliver solutions to complex problems.

Work with large, complex data sets and high-throughput data pipelines that meet business requirements

Build the infrastructure required for optimal extraction, transformation, and loading of data from a variety of data sources

Build data and analytics tools that utilize the data pipeline to provide actionable insights into operational efficiency and other key business performance metrics

Work with internal and external stakeholders to assist with data-related technical issues and

support data infrastructure needs

Collaborate with data scientists and architects on several projects

### **What's working at Dev.Pro like?**
