Data Engineer - Software Engineer III

[Apply Now](#)

Company: JPMorgan Chase & Co.

Location: Buenos Aires

Category: computer-and-mathematical

Join us as we embark on a journey of collaboration and innovation, where your unique skills and talents will be valued and celebrated. Together we will create a brighter future and make a meaningful difference.

As a Data Engineer III at JPMorgan Chase within the Finance team, you are an integral part of an agile team that works to enhance, build, and deliver data collection, storage, access, and analytics solutions in a secure, stable, and scalable way. As a core technical contributor, you are responsible for maintaining critical data pipelines and architectures across multiple technical areas within various business functions in support of the firm's business objectives.

Job responsibilities

Generates data models for their team using firmwide tooling, linear algebra, statistics, and geometrical algorithms

Delivers data collection, storage, access, and analytics data platform solutions in a secure, stable, and scalable way

Implements database back-up, recovery, and archiving strategy

Evaluates and reports on access control processes to determine effectiveness of data asset security with minimal supervision

Adds to team culture of diversity, equity, inclusion, and respect

Required qualifications, capabilities, and skills

Experience with Python

Working experience with both relational and NoSQL databases

Experience and proficiency across the data lifecycle

Experience with database back-up, recovery, and archiving strategy

Proficient knowledge of linear algebra, statistics, and geometrical algorithms
