

Database Developer with Cloud

[Apply Now](#)

Company: Jalasoft

Location: Argentina

Category: computer-and-mathematical

Jalasoft, a leading technology company, is seeking a skilled Database Developer with Cloud expertise to join our dynamic team. As a world-class company, we are committed to providing the best software solutions, and we believe in the power of education and learning to drive innovation. With over 1000+ Engineers, we are proud pioneers in the region, having trained over 1500 engineers in our Training Programs. At Jalasoft, there's a whole world of opportunities awaiting you to contribute to the growth of the Software industry in LATAM.

Requirements

Strong proficiency in Microsoft SQL Server, including stored procedures, T-SQL, functions, and various database configurations.

Hands-on experience in designing and implementing ETL pipelines and data coding techniques to ensure efficient and reliable data flow.

Proven hands-on experience in constructing complex SQL queries independently for data validation and data integrity.

Solid understanding of relational database structures, indexes, constraints, and data types.

Employ data coding techniques, such as the use of temp tables, CTEs, joins, SQL functions,

etc., to optimize data operations and enhance performance.

Proven data warehousing experience to design, develop, and optimize data warehousing solutions, integrating data from various sources.

Strong experience with cloud platforms and cloud-based data services, with a preference for Google Cloud Platform. Experience with other cloud providers, such as AWS and Azure, is also welcome.

Experience with BigQuery, Data Fusion, Composer, Cloud Storage, Cloud SQL, or their equivalents in AWS and Azure.

Analyze and interpret performance metrics to identify areas of improvement and recommend data-related enhancements.

Experience with SSIS (SQL Server Integration Services) for building, deploying, and managing ETL processes.

Excellent collaboration and teamwork skills, accustomed to working closely with the team throughout the development cycle.

Bonus Points:

Automation Skills: Experience in automating data validation tasks, streamlining processes for efficiency and repeatability.

Familiarity with data testing tools, using them to ensure data accuracy and quality throughout the data lifecycle.

Experience with non-relational database services.

Background in Behavior-Driven Development (BDD) methodologies

Benefits

Remote work.

13 floating holiday

15 vacation days per year completed

good working environment
