## Full Stack API Developer

[Apply Now](#)

Company: Instrumental Group

Location: Argentina

Category: computer-and-mathematical

\*Applications/Resumes must be submitted in English in order to be considered Instrumental Group is seeking a Full Stack Developer to join our growing international digital agency. The perfect candidate will be an ambitious, driven individual with a grasp of front & back-end development languages & best practices. Our new hire will work in a web-based programming environment and be supported by a team of UX/UI designers, marketers, system architects, and developers. They'll learn modern strategies for product development, and how to bring designs to life across a host of applications and viewing devices. The prospective team member should understand how to work with deadlines, be driven to succeed and be highly organized. You'll need a solid code base and a portfolio of work to be considered. We have the tools and environment to turn you into an expert developer in the latest technologies. Join us to further develop your skills at an accelerated pace on the cutting edge of customer experience.

**Core Responsibilities** Support agency and client requests that require programming Leverage nodeJS, CSS, and Javascript skills to modify existing code base Translate visual designs into HTML, CSS, and JavaScript with an emphasis on pixel-perfect fidelity and responsiveness Successfully integrate a variety of software with HubSpot via custom API integration Effectively prioritize and execute tasks with proper planning to work on multiple projects simultaneously Work within Project Management Software, Slack, and HubSpot Stay current with modern web trends and related technologies

**Desired Experience** At least 5 years of relevant programming experience Fluent in both English and Spanish Strong verbal and written communication skills Ability to conduct technical analysis and research Problem-solving aptitude Experience with API Integrations Familiarity with

Salesforce and HubSpot SDKs from an end-user perspective Coding Languages: HTML, JavaScript, HTTP/S, node.js 16.x, Python 3.9, React Server Knowledge: client/server architecture, state management, caching, and security paradigms. Experience with web server configuration eg. IIS, Apache, NGINX, etc.) Database Knowledge: relational/SQL and non-tabular/NoSQL database design & optimization. Experience with various database platforms in either/both categories eg. MS-SQL, MySQL, PostgreSQL, REDIS, MongoDB, Amazon DynamoDB Message Queue management: Publish/Subscribe messaging, queues & streaming paradigms. Experience with real time messaging/streaming platforms eg. MSMQ, Kafka, RabbitMQ, ActiveMQ, Amazon SQS Application Containers: Building, packaging and deploying applications. Experience with tools for deployment eg. Docker, Podman, Buildkit, etc. API Knowledge: Foundational knowledge of REST API development. Experience building integrations with enterprise-grade CRM systems (g. HubSpot, Salesforce. Knowledge of file formats such as json, xml as well. Version control systems: Experience with version control systems eg. GitHub, GitLab, Bitbucket, etc. Experience in DevOps to implement cloud-based application solutions, drive innovation, and improve processes. Responsibilities include: Implementing scalable, resilient, and secure solutions in AWS. Automating processes to enhance efficiency and reduce hosting costs. Collaborating with Product Owner, Platform Team, Solution Architects, and development teams for continuous improvement. Driving automation and Infrastructure as Code delivery. Participating in technical discussions with clients and internal teams. Conducting research and development for cloud-native or on-premises solutions. Analyzing and troubleshooting complex software and infrastructure issues. Providing support for critical and escalated issues. Managing and upgrading DevOps toolsets. Maintaining 100% automation coverage of core Insight build and deploy using cloud-native services and containers. Qualifications: 2+ years' experience with AWS and other cloud services. Experience with AWS tools/services like Lambda CloudFormation, EC2, SES, S3 Aurora, RDS VPC, Route 53 and the security and compliance services. Corporate Vision Our organization is a growing international digital services agency looking to add to our growing world-class development team. As leading HubSpot implementation partners, that generally centers around the use of HubSpot inside their technology stack. If you're looking to join a fast-paced, dynamic digital agency and work in the latest programming technologies, we want to talk to you. Powered by JazzHR
