Full Stack Software Engineer

Apply Now

Company: Cartage AI

Location: Argentina

Category: computer-and-mathematical

What We Do

At Cartage AI, we give logistics companies a competitive advantage in moving freight, by automating the core workflows that drive their business with AI.

We help our customers:

    Make decisions faster and more accurately

    Reduce human error and variance

    Devote human power to critical business areas that cannot be automated

    Reduce operational costs and headcount

We build bespoke automations for each customer, with a strong focus on integrating with and augmenting their current workflows and systems.

The Role

Responsibilities

    Work across our full tech stack, building scalable solutions that enable positive user experiences

    Develop new features and infrastructure in support of business and product requirements

Investigate and resolve production bugs and other customer issues

Ensure application performance, uptime, and scale, maintaining high standards of code quality and thoughtful application design

Ideal Profile

About You

1+ year(s) of full stack engineering experience in a start-up environment

Proficiency in React and Typescript/Javascript

Portfolio of past projects is nice to have, but not required

What's on Offer?

Transparent and social culture, challenging work, fast learning cycles, and meaningful feedback

Strong sense of ownership and strategic work that impacts our product, users, colleagues, and business

Complete flexibility, minimal meetings, and the ability to work remotely from anywhere in the world
