Fullstack Engineer

Apply Now

Company: CONEXIONHR

Location: Buenos Aires

Category: computer-and-mathematical

We are a fintech startup providing cutting-edge software-as-a-service solutions to institutional investors. Our current offering includes advanced financial analysis, trade flow, and portfolio management solutions. We were founded in and have grown at a rapid pace, providing services to a wide range of industry leaders. As we continue to grow, we are looking for exceptional Software Engineers to join our team and help accelerate our business and our technology.

Key responsibilities:

● Design, implement and maintain components and frameworks that add to our toolset.

● Collaborate with internal and external clients to understand their application development needs.

● Research new technologies and use-cases. Seek out inefficiencies and match relevant technology solutions to resolve them.

● Participate in code reviews and provide technical feedback to the team.

Qualifications:

● Self-starter who is passionate about technology.

● Keen eye for automation and improving efficiency.

● Ability to provide leadership and accountability for work they undertake.

● Takes ownership of their work and has exceptional attention to detail.

● Has excellent communication skills and the ability to articulate their thoughts and ideas.

● Able to take on ideas and feedback from both technical experts and business thought-leaders.

Required skills and experience:

- Experience in C#/.NET (ASP.NET Core)

- Experience in Angular.

- Expertise in SOLID principles and commonly used design patterns.

- Working knowledge of relational databases.

- Attention to good UI/UX design.

- Good communication skills.

- Ability to work in agile-based project management structure.

- Familiarity with Git.

Preferred skills and experience:

- Experience with Python.

- Experience with cloud platforms such as AWS and Azure.

- Familiarity with debugging front-end rendering & performance issues using browser

development tools.

- Understanding of how to optimize a component's UI/UX performance.

Benefits:

- % remote.

- USD payment.

- 4 weeks of vacations and 10 local holidays paid.
