Company: Nexos

Location: Austria

Category: other-general

Who we are / our Client Company in Austria

Nexos is a private HR recruiting and consulting company. We operate on the international recruiting market and are looking for experts to work in the Austrian job market.

The modern world of work is frequently characterised by considerable uncertainty and largescale change. By contrast, our client offers crisis-proof jobs for the long-term. The company has a precise understanding of the logistics sector. Their goal is to satisfy their customers throughout Austria with quality products and the reliable delivery of services in the mail, banking, telecommunications, and energy fields. To achieve this aim, they place great emphasis on an appreciative and open working environment.

Work environment

- Flexible working - in the modern environment of the headquarters, but also remotely throughout Austria.
- Innovation - working on challenging and exciting tasks.
- Internationality - a creative working environment with international and diverse teams.

As an IT Quality Assurance Engineer, you will

- Define, create, implement, and document manual and automated test cases as well as determine of quality criteria.
- Participate in the design of test and quality guidelines and monitor compliance.
- Participate in Agile ceremonies and cross-team coordination (e.g., community of practice).
- Generate test data and use existing automation frameworks and tools.
- Perform error management.
- Participate in the analysis of existing software components and solutions as well as the cost estimate and test design of new ones.

What you bring with you

- Completed high school diploma at Matura level (equivalent to A-Level/International Baccalaureate etc.).
- ISTQB certification is of advantage.
- Several years of experience in software testing with complex system landscapes in different areas (e.g., app development, cloud solutions, etc.).
- Basic skills in software development (.NET, .NET Core, C#, CSS, Java Script, REST, SQL) and in Agile methods and their scaling.
- Knowledge of market-typical testing tools for test documentation, test automation etc.
- Experience in performance testing.
- Experience with webservices(GIT, TFS) and utilisation of Azure DevOps is of advantage.
- Strong communication and problem-solving skills.
- High level of quality awareness and accuracy.
- Team skills in an international environment.

Offer

- Food vouchers as well as occupational health promotion.
- A free bank account
- Discounted holiday offers in one of our many holiday homes.
- A gross annual salary starting from EUR 45,000, all-in.

Your Nexos Recruitment Team awaits your application.

Contact
