

Lead Software Test Engineer (WebCTV)

[Apply Now](#)

Company: Techunting

Location: Crespo

Category: computer-and-mathematical

At Pluto TV, we approach testing differently - we are testing, and breaking, code constantly, but we help rebuild it better. Software Test Engineers (STE) design Pluto TV's testing infrastructure and perform tests to examine and validate large-scale content operations and releases. The STE will also act as a representative of the Software Test Engineering Team in scrum meetings and provide input on how to provide better quality coverage for the applications supported.

Responsibilities:

Work in an Agile Software Delivery methodology highly focused on developing automated tests within an iteration.

Leadership of Software Test Engineers

Provide a risk assessment on the defects identified and set the correct severity.

MUST HAVES:

Native applications / OTT Platforms functional testing experience

Formal testing experience from planning to execution

Automation experience using Java frameworks

People Leadership experience

Project Leadership experience

3+ years experience of leading engineers working with on-site and offshore teams

3+ years of testing experience on OTT platforms (WebOS based TVs)

2+ years experience leading testing activities ? Mentoring of team members on the following competencies:

Test Automation and STE Test Automation Standards.

Use of STE Unified Test Framework.

Application behavior and testing techniques.

Test coverage for application(s) supported.

Efficient testing strategies.

3+ years of experience as a test engineer within an Agile environment

3+ years of Functional Testing on Native Apps, OTT (Over-the-top), web platforms, a BIG plus.

3+ years Hands-on experience with developing automated functional tests

Experience in Video Content Delivery Experience, a big plus

Exposure to Agile Management tools such as Jira, a plus
