### Description

**About GE Vernova** GE Vernova is a planned, purpose-built global energy company that includes Power, Wind, and Electrification businesses and is supported by its accelerator businesses of Advanced Research, Consulting Services, and Financial Services. Building on over 130 years of experience tackling the world's challenges, GE Vernova is uniquely positioned to help lead the energy transition by continuing to electrify the world while simultaneously working to decarbonize it. GE Vernova helps customers power economies and deliver electricity that is vital to health, safety, security, and improved quality of life. GE Vernova is headquartered in Cambridge, Massachusetts, ., with more than 80,000 employees across 100+ countries around the world.

GE Vernova's **Gas Power** business engineers advanced, efficient natural gas-powered technologies and services, along with decarbonization solutions that aim to help electrify a lower carbon future. As part of the Gas Power One Field Services team, **FieldCore** installs, maintains and upgrades power generation equipment, enabling operators of the world's energy infrastructure to provide more reliable and affordable energy.

### Job Summary

The primary responsibility of the Steam/Gas Mechanic is to safely accomplish the installation, maintenance and repair of the heavy rotating machinery used mainly in power generation applications. Turbine Mechanics work closely with Supervisors, EHS personnel, and the Operations Department to achieve these goals. You may be assigned other duties to help proactively drive our FieldCore vision and align with our organization's core values.

## **Essential Duties & Responsibilities:**

Dismantle, assemble, move and align, machinery and equipment using: hoists, cranes, chain falls, hand tools, power tools, pneumatic and hydraulic tools, micrometers, rules, squares, plumb bobs, dial indicators and/or laser alignment equipment

Read blueprints, schematic drawings and technical documentation to determine proper work procedures

Responsible for shipping and receiving all major pieces for T&DC, plus all shipping, receiving, inventory, and control of tools, equipment and supplies

Perform material and machine inspections using precision measuring equipment such as micrometers, rules, calipers, protractors, and torque wrenches

Perform machining and welding operations for making various parts for lab and shop training equipment

Determine equipment specifications and prepare parts lists for purchasing, consisting of mechanical, electrical, and hydraulic devices as needed to complete assigned projects

Load, transport, and unload materials, tools, equipment and supplies and perform mechanical and electrical maintenance and repairs as needed

Read blueprints, schematic drawings and technical documentation to determine proper work procedures

Install machinery and equipment according to layout plans, blueprints and other drawings in industrial establishments

Ability and willingness to work holidays, weekends and overtime as required by field assignments.

## **Required Qualifications & Experience :**

Minimum of one (1) years' experience maintaining, dismantling, and installing machinery and industrial service equipment including various pumps, motors, fans, generators, and turbines

Valid Driver's License

Preferred: Degree/Associate Degree in Technical Field or Gas Turbine Systems

**Desired Characteristics:**

Ability to disassemble and reassemble complex rotating equipment – Bolting, Hydraulic Bolting, Flange Management, Small Bore Piping, Basic Rigging/Lifting, O/H Crane Operator

Proficient in the following: mechanical/technical skills, oral communications skills, Critical Thinking

Manage time-sensitive tasks and maintain a schedule within operationally challenging environments.

Must work well both independently and in a team environment.
