Company: RH Visión

Location: Argentina

Category: office-and-administrative-support

Job Summary:We are seeking an experienced Automation Tester to join our Web Development team. The successful candidate will be responsible for designing, developing, and executing automated tests to validate the functionality and performance of software applications. This role will involve collaboration with QA analysts and software developers to create test solutions, ensuring that our applications are of the highest quality. **Requirements:** Bachelor's degree in Computer Science, Engineering, or a related field. Proven experience as an Automation Tester or similar role, preferably in web development. Strong knowledge of testing tools and methodologies, with experience in using tools like Selenium, JMeter, or TestNG. Excellent problem-solving and analytical skills, with the ability to identify and address potential issues. Strong communication and collaboration skills, with a focus on working effectively with cross-functional teams. Attention to detail, ensuring thorough testing and high-quality results. A self-starter with the ability to work independently and manage multiple tasks simultaneously. **Roles and Responsibilities:** Identify suitable test cases for automation, ensuring comprehensive coverage of application features and functionality. Develop a detailed automation test plan, collaborating with team members to ensure its approval and alignment with project goals. Create and maintain automated test scripts, utilizing various testing tools to optimize efficiency and effectiveness. Execute test scripts, meticulously documenting results and identifying areas for improvement. Manage defects throughout their lifecycle using tools like JIRA, ensuring timely resolution and minimizing impact on project timelines. Engage with stakeholders to understand system functionality and business domain, ensuring test solutions are relevant and effective. Continuously improve

testing processes and methodologies, staying up-to-date with industry best practices and emerging technologies.
