MIDDLE/SENIOR REACT.JS ENGINEER

[Apply Now](#)

Company: Svitla Systems, Inc.

Location: , , Argentina

Category: other-general

Svitla Systems Inc. is looking for a Middle/Senior React.js Engineer for a full-time position (40 hours per week) in Argentina. Our client is an American multinational corporation that provides property management software for the multifamily, commercial, single-family, and vacation rental housing industries. The Company's property management systems streamline site-based business processes such as screening, leasing, and rent management and automate back-office accounting, portfolio management, and revenue management functions. The company offers marketing, digital content services, resident utility billing services, utility management suites, monetized multifamily home-sharing services, sustainability services, and vendor management services. Founded in 1998, it serves over 24 million units worldwide from offices in North America, Europe, and Asia. The core product is an engagement platform for apartment residents, and the rapid growth will present you with a range of opportunities for achievement and long-term growth. Requirements: 5+ years of experience in software development 3+ years of experience with React & Typescript Must have strong fundamentals in React, state management, hooks, life-cycle management, props, and other related React design patterns Must have a good understanding of Typescript and structural type systems 3+ years of experience with automated unit testing (e.g., Jest or similar unit test frameworks) Excellent communication skills and fluency in both written and spoken English A solid understanding of mobile UI/UX best practices and an ability to discuss the best approach to UX problems Responsibilities: Collaborate with Product and Design to deliver new user experiences and features to our customers Provide input on technical feasibility of designs and present options for implementation approaches to guide planning of projects Work

with teams on other products to build integrated user experiencesCollaborate with your team to take on ownership of problems and deliver solutions that meet delivery deadlinesOperate within a Scrum Agile environment with a Scrum team.Will be a plus:Building or consuming GraphQL APIsWorking with design systems and reusable component librariesExperience working with micro-frontend architecture and web components.We Offer:US and EU projects based on advanced technologies.Competitive compensation based on skills and experience.Remote-friendly culture and no micromanagement.Bonuses for recommendations of new employees.Bonuses for article writing, public talks, other activities.15 vacation days, 10 national holidays, sick leaves.Udemy unlimited training account.Free webinars, meetups and conferences organized by Svitla.Fun corporate celebrations and activities.Awesome team, friendly and supportive community!About Svitla:Svitla Systems is a global trusted IT solutions company headquartered in California, with business and development offices throughout the US, Latin America, Europe, and Asia.Svitla is an outspoken advocate of workplace flexibility, best known for its well-established remote culture, individual approach to our teammate's professional and personal growth, and family-like environment.Since 2003, Svitla has served a wide range of clients, from innovative start-ups in California to mega-large corporations such as Ingenico, Ampliance, InvoiceASAP and Global Citizen. At Svitla, developers work with clients' teams directly, building lasting and successful partnerships, as a result of seamless integration with on-site processes.Svitla Systems' global mission is to build a business that contributes to the well-being of our partners, personnel and their families, improves our communities, and makes a lasting difference in the world. Join us! Share If you are interested in our vacancy, please send your CV. We will be happy to see you in our friendly team :)
