**MongoDB Database Consultant**

**Apply Now**

Company: Percona

Location: , , Argentina

Category: other-general

At Percona, you'll get a chance to see and work on any database architecture you can imagine. Our Consultants work on projects with a huge variety of companies, from internet startups to established brick-and-mortar publicly traded companies. We're looking for MongoDB experts who can step back and look at the full stack, as well as learn and share their knowledge about other widely used open-source data technologies.The Consultant will develop relationships with customers, comprehend and fulfill their needs, and maintain their satisfaction through onsite and remote customer engagements. He/she will scope the technical work that is required to ensure the best possible solution is delivered to the customer given the customer's unique set of business requirements. Additionally, the Consultant will troubleshoot and resolve customer issues of any complexity as the need arises.You will work remotely and most people work from their homes. Up to 25% travel may be required, both for onsite projects and internal meetings (as safety permits). Access to a reliable high-speed Internet connection is required. This position is for the Americas time zones, and the Consultant must be able to work full-time during US business hours.What You Will DoPerform the entire range of our MongoDB consulting services for customersEffectively assess not only the dynamics of the technology, but the people managing it, tooCreate multiple types of documentation, whiteboard solutions, and conduct training as required to ensure the client understands and is satisfied with your solutionSeamlessly maneuver between talking low-level technical details or high-level strategy depending on the situationMaintain proficiency in all Consulting tools, software, and standard operating proceduresBe an active thought leader via monthly blogging, quarterly webinars, and

conference talks/tutorials at least once per yearBe an active technical leader via weekly contributions to our Experts' forums, email lists, and monthly publishing of KB articlesWhat You Have Done5+ years of MongoDB administration, including but not limited to the following areas: installation, configuration, upgrades, tuning3+ years of Linux administration experience, including performing hands-on work in the areas networking, hardware, virtualization, containers, scripting, and IO subsystems2+ years of performing the following types of engagements: architecture and design reviews, performance audits, and database migrations2+ years in a consulting role leading both short and long-term projectsStrong Shell skillsProficiency in at least one of the following languages: PHP, Java, Nodejs, Go, Python, RubyProduction-based experience with both on-premise and cloud environments, including with customers that run database environments across multiple datacenters/regions, and manage large datasetsExperience delivering presentations to both technical and management/executive teamsWhat Will Make You Stand OutExperience with Puppet, Chef, Ansible, Vagrant, Consul, etc.Experience with Content Management Systems (Drupal, Wordpress, etc.) and eCommerce platforms (Magento, etc.)Experience with training development and deliveryDemonstration of active thought leadership in the MongoDB community (blogs, conference talks, etc.)Ability to read and interpret MongoDB code for the purpose of debugging and troubleshootingCross-over experience with MySQL, PostgreSQL or ClickHouseExperience working with cloud-native applications and containerization technologies e.g. Docker and KubernetesAWS, Google Cloud, and Microsoft Azure certificationsProject management experiencePercona is a respected thought leader in the open source community. We provide services and software for MySQL, MongoDB, PostgreSQL and MariaDB to open source users globally.Percona is remote-first and globally dispersed; we have colleagues in more than 40 countries. We offer a collaborative, highly-engaged culture where your ideas are welcome and your voice is heard. The growth and development of our staff is a top priority; we provide funding for training, certifications, conferences and more.Discover what it means to work with some of the smartest people in the industry, who also know how to have fun and are always willing to lend a helping hand. We offer flexible hours, the ability to work remotely and the amazing experience of working with a multinational team of experts.
