Argentina Jobs Expertini®

Network Engineer

Apply Now

Company: ExxonMobil Corporation

Location: Buenos Aires

Category: computer-and-mathematical

What you will do

Design, implement, optimize, and troubleshoot complex network solutions to support business growth.

Ensure company connectivity is up to date, performant and reliable.

Enhance and expand network monitoring systems.

Continuously improve automation, cloud integration and staying on top of demands to ensure a secure infrastructure.

Perform investigation and escalation requests to troubleshoot systems including but not limited to network components.

About you

Bachelor Degree or close to graduating in Electronic Engineering, Software Engineering, Systems Engineering, Computing Engineering, Computer Science or similar

Advanced verbal and written communication English skills

2+ years' experience in an Infrastructure or Site Reliability Engineering role, applying DevOps principles

Ability to design and implement network solutions for both LAN and WAN

Management of Routing, Switching, VRF, SDWAN, Wireless & monitoring tools

Advanced knowledge on network protocols such as IP addressing, DNS, DHCP, TCP, BGP, MPLS & OSPF

Willingness to learn new technologies

Ability to interact with vendors

Preferred Qualifications/ Experience

Working experience in an Agile organization

Knowledge on Cisco and Juniper platforms

Experience in Load Balancing and WAAS technologies

Network security knowledge such as Firewall management, ACL and Authentication

The ability to script in Python / PowerShell / Bash

Willingness to develop automation and tools to increase reliability and reduce time to market using scripting and orchestration technologies such as Puppet, Ansible or comparable automation tools

Prior experience with any cloud vendor (Azure, AWS or GCP)
