

Python Developer

[Apply Now](#)

Company: Siemens S.A.

Location: Buenos Aires

Category: computer-and-mathematical

We are seeking a talented **Python Developer** to join our team to create digital solutions. In this role, you will collaborate closely with our Project Manager and Data Science team to develop, and maintain scalable data solutions.

Responsibilities:

Collaborate with the Project Manager to design and plan data engineering and data science solutions that address specific business problems.

Develop connectors and integrations to efficiently gather data from a variety of sources, ensuring data accuracy and reliability.

Pre-process inbound data: Clean, transform, and preprocess incoming data to align with internal system standards and data quality requirements.

Post-process internal system data: Transform and optimize internal system data to meet the specifications of designed solutions.

Provide maintenance: Continuously monitor, optimize, and provide support for existing data solutions to ensure their reliability and performance.

Creating dashboards: Collaborate with the Project Manager to create informative and visually appealing dashboards to present data insights.

Requirements:

English Proficiency: Must have a minimum of B2 or C1 level of English proficiency to effectively communicate and collaborate with international team members.

Educational Background: System Engineering (in progress).

Python Expertise: Experience working with Python, including proficiency in data manipulation and scripting.

SQL Mastery: Experience with SQL for data querying and manipulation.

Solution Development: Experience in developing functional and scalable solutions for data engineering or data science projects.

Data Processing: Ability to process and analyze large volumes of data from various sources efficiently.

Bonus Skills (Preferred):

Apache Airflow: Experience working with Apache Airflow for workflow automation and scheduling.

AWS Lambda: Familiarity with AWS Lambda for serverless computing and data processing.

Dashboard and Front-End Design: Knowledge of building data visualization dashboards and basic front-end design principles is a plus.

If you are a highly motivated and skilled Python Developer with a passion for data engineering and data science, we encourage you to apply and become a valued member of our team. Help us drive innovation and create digital solutions that solve real-world problems
