

## Python Engineer

[Apply Now](#)

Company: Teramind

Location: Buenos Aires

Category: computer-and-mathematical

Teramind is a hybrid, global workforce building the next-generation Insider Risk Management and User Behavior Analytics platform.

Join our team of innovators who are redefining insider risk management through cutting-edge technology. More than 10,000 organizations across the globe have used Teramind to mitigate insider threats and protect their sensitive company data with the most robust, enterprise-grade software on the market.

As a global team, Teramind embraces an inclusive and flexible work environment and team culture. We win together, learn from each other and respect each other while delivering best-in-class security solutions.

### **About the role**

As a Python Engineer, you will be responsible for developing and maintaining robust and scalable Python applications within the Teramind platform. You will work closely with a cross-functional team to design and implement new features, improve existing functionality, and optimize performance.

### **Responsibilities**

Design and develop high-quality Python code for new features and enhancements

Collaborate with other teams to gather requirements and understand project needs

Troubleshoot and resolve software defects and issues

Optimize application performance and scalability

Participate in code reviews to maintain code quality

Serve as the technical owner of features, overseeing their entire lifecycle from design through implementation to ongoing support

## **Requirements**

4+ years of professional experience as a Python Developer

Strong understanding of fundamental design principles behind scalable applications

Experience with algorithms, data structures, complexity analysis, and software design

Proficient in writing SQL queries and working with relational databases

Proficient knowledge of Git

Strong problem-solving and analytical skills

Excellent communication and collaboration abilities

## **Will be a plus**

Experience with Flask, Pydantic, SQLAlchemy, FastAPI

Experience with Data warehousing/analytics solutions (Snowflake, Redshift, Tableau, Druid, etc)

Experience with ClickHouse DBMS

## **Benefits**

This is a remote job. Work from anywhere! We're a global, distributed team looking for the finest talent. We've been thriving as a fully-remote team since 2014. To us, remote work means flexibility and having truly diverse, global teams.

At Teramind, we're a collaborative, forward-thinking team where new ideas come to life, experience is valued and talent is incubated.

Competitive salary with a focus on a global market

Career-growth opportunities

Flexible Time Off and Paid Time Off benefits

Ongoing training and development opportunities

### **About our recruitment process**

We don't expect a perfect fit for every requirement we've outlined. If you can see yourself contributing to the team, we want to hear your story.

You can expect up to 4 interviews. In some scenarios, we're able to streamline the process to have minimal rounds. Director-level roles and above should expect a more thorough process, with multiple rounds of interviews.

### **All roles require reference and background checks**

*Teramind is an equal opportunity/affirmative action employer. All qualified applicants will receive consideration without regard to race, age, religion, color, marital status, national origin, gender, gender identity or expression, sexual orientation, disability, or veteran status.*
