

Senior Application Security Engineer

[Apply Now](#)

Company: Apollo

Location: Argentina

Category: computer-and-mathematical

Your Role

& Mission

The **Senior Application Security Engineer** will work with product and engineering to create a secure SDLC, design security features and implement tools, education and processes to reduce risk of security issues in the tech stack.

Responsibilities

Select or build tooling to help developers build secure code

Provide overall security architectural advice to Engineering and IT

Manage issues sourced from penetration tests and bug bounty programs

Participate in the security champions program

Help Product, Engineering and IT incorporate security requirements into new products from inception

Assist in the creation and maintenance of Security Risk Models for new projects and existing systems

Skills & Competencies

5+ Years of Web Application Security experience

Strong experience with vulnerability management, or penetration testing is required.

Extensive experience in conducting Architectural Reviews and Threat Models frequently is required.

Strong knowledge of common AppSec issues and tooling (e.g. SCA, SAST, DAST)

Strong software development skills, can do coding and read code.

Strong Communication and Influencing skills

Should have worked in SaaS environment.

Should have extensive knowledge of Open Redirect, OAuth, and CSRF.

Strong Linux knowledge is a plus.

Experience with cloud services, ideally GCP is a plus.

Certifications: OSCP/OSWE/CEH: At least 1 Certification is a plus

#LI-JM1
