Company: Varsity Tutors

Location: Argentina

Category: computer-and-mathematical

Varsity Tutors, a Nerdy company, is seeking an innovative Senior Data Analyst based in Argentina to join our team and work on impactful initiatives providing decision support to business leadership through quantitative analysis mining our data for opportunities, and technical development of new data pipelines and reporting. The Senior Data Analyst will be responsible for collecting, transforming, and organizing our data to find insights, make predictions, and drive to the next decision.

About Nerdy:

Qualifications:

Bachelor's degree in Computer Science, Engineering, Business, Economics, Mathematics, Statistics, or related field or equivalent experience.

5+ years of experience as a Data Analyst

Advanced proficiency with Excel or other analytical tool

Working knowledge of SQL

Ability to summarize large fields of data and present and visualize this information in a compelling, digestible fashion.

Superior analytical and quantitative skills; experience using data and metrics to test theories, confirm assumptions, and measure success.

Ability to effectively communicate data and information to senior management.

Comfortable diving deep into very large fields of data

Deep and abiding love for figuring out how things work, then relentlessly testing and optimizing to drive desired outcomes.

Proven ability to identify, analyze, and solve ambiguous problems with an extreme attention to detail.

Exceptional problem-solving, decision-making, and written communication skills.

Comfortable with data wrangling; experience working with data engineers to source and efficiently operationalize new data streams.

Experience with Looker a plus.

Forecasting or demand planning experience a plus

Responsibilities:

Work with partners in respective domains to develop deep understanding of their use cases, data schema, develop metrics, and drive insights and decision making.

Pull data, analyze, and communicate results. Pivot or shift approaches when necessary in response to what you learn.

Identify optimization opportunities, areas of high variance; provide guidance on operational improvements.

Generate robust data reports at both high (summary) and low (verbose deep-dive) level.

Clear presentation and communication of data and highlights is key.

Strive to reduce friction through automation of reports, consolidation of data sources, and exploration of additional metrics and data points to track.

Drive learning and optimization of funnel through experimentation, creative iteration, and A/B testing.
