Senior Data Analyst

Apply Now

Company: F5

Location: Argentina

Category: computer-and-mathematical

At F5, we strive to bring a better digital world to life. Our teams empower organizations across the globe to create, secure, and run applications that enhance how we experience our evolving digital world. We are passionate about cybersecurity, from protecting consumers from fraud to enabling companies to focus on innovation.

Everything we do centers around people. That means we obsess over how to make the lives of our customers, and their customers, better. And it means we prioritize a diverse F5 community where each individual can thrive.

Senior Data Analyst

We are seeking a highly skilled and experienced Senior Data Analyst to join our team. The ideal candidate will play a pivotal role in steering the lifecycle of our internal data products, from conceptualization through to deployment and continuous improvement. This individual will be instrumental in fostering strong communication channels between stakeholders, ensuring that data insights are effectively translated into actionable strategies. By leveraging cutting-edge tools like Snowflake for data warehousing and Tableau for data visualization, the Senior Data Analyst will drive the development of intuitive dashboard UIs, facilitating a seamless data-driven decision-making process across the organization.

Key Responsibilities:

- Stakeholder Communication: Serve as the primary liaison between the data team and internal stakeholders, translating complex data concepts into clear, actionable insights. Regularly engage with stakeholders to gather requirements, provide updates, and adjust

project priorities based on evolving business needs.

- Project Management: Lead and manage data analytics projects from inception to completion, ensuring timely delivery within scope and budget. Apply best practices in project management to coordinate cross-functional teams, allocate resources effectively, and mitigate risks.

- Lifecycle Support for Internal Data Products: Oversee the end-to-end process of internal data product development, including requirement gathering, design, implementation, testing, deployment, and post-launch support. Implement agile methodologies to continuously refine and enhance data products based on user feedback and performance metrics.

- Dashboard UI Design Expertise: Design and develop compelling, user-friendly dashboard interfaces using Tableau, optimizing the visualization of complex datasets for diverse user groups. Employ a keen eye for design and usability to ensure that dashboards facilitate quick insights and foster data-driven decision-making.

- Technical Proficiency: Demonstrate expert knowledge and hands-on experience with Snowflake for efficient data storage and management. Utilize advanced features of Tableau for data visualization, creating interactive reports and dashboards that meet the specific needs of the business.

Qualifications:

- Bachelor's degree in Computer Science, Data Science, Statistics, or a related field. Advanced degree preferred.

- Minimum of 5 years of experience in data analytics, with a proven track record of managing data projects and designing data products.

- Strong project management skills, with experience in agile development methodologies.

- Exceptional communication and interpersonal skills, with the ability to engage effectively with both technical and non-technical stakeholders.

- In-depth knowledge of Snowflake and Tableau, including advanced data modeling, analysis, and visualization techniques.

- A portfolio of dashboard designs or case studies demonstrating expertise in UI/UX design principles for data visualization.

Position Offerings:

This is a full-time position that offers competitive compensation, comprehensive health benefits, retirement plans, and a flexible working environment. Our team is committed to professional development and encourages continuous learning and growth opportunities in

emerging data technologies and analytics methodologies.

The Senior Data Analyst will be at the forefront of our data-driven initiatives, making a significant impact on the strategic direction of our company. If you are passionate about leveraging data to drive business success and thrive in a collaborative, innovative environment, we encourage you to apply.

The Job Description is intended to be a general representation of the responsibilities and requirements of the job. However, the description may not be all-inclusive, and responsibilities and requirements are subject to change.

The annual U.S. base pay range for this position is: $112,960.00 - $169,440.00

F5 maintains broad salary ranges for its roles in order to account for variations in knowledge, skills, experience, geographic locations, and market conditions, as well as to reflect F5's differing products, industries, and lines of business. The pay range referenced is as of the time of the job posting and is subject to change.
