[Apply Now](#)

Company: Snaphunt

Location: Argentina

Category: computer-and-mathematical

### The Offer

Work alongside & learn from best in class talent

Flexible working options

Excellent career development opportunities

### The Job

#### You will be responsible for :

Writing well-designed, testable and efficient code.

Gathering and evaluating user feedback.

Working as a part of a dynamic team to deliver winning products.

Providing code documentation and other inputs to technical documents.

Supporting continuous improvement by investigating alternatives and new technologies and presenting these for architectural review.

Troubleshooting and debugging to optimise performance.

Analysing, monitoring, configuring and maintaining existing systems and identify room for improvements.

Ensuring overall system and server uptime, availability, reliability and security.

Liaising with 3rd party vendors, IT providers, etc. for specific requirements.

Troubleshooting system/server issues or outages.

Building tools to reduce occurrences of errors and improve customer experience.

Designing procedures for system troubleshooting and maintenance.

Investigating and resolving technical issues by deploying updates/ fixes.

### **The Profile**

You possess a Degree/Diploma in Computer Science, Engineering or related field.

You have at least 3 years experience, ideally within a System Administrator or Software Engineer role.

You are highly goal driven and work well in fast paced environments

You are a self-starter and demonstrate a high level of resilience

You pay strong attention to detail and deliver work that is of a high standard

### **The Employer**

Our clients mission is to make Web3 data accessible for everybody. Their software interprets the incredibly complex world of blockchain data. The problem they're solving changes and grows every day, so there's never a dull moment. And that's how they like it. They are a startup. They move fast and ship daily.
