Company: Stensul

Location: Argentina

Category: computer-and-mathematical

Who we are

The Stensul Marketing Creation Platform™ reduces marketing asset creation time by up to 90% to help teams focus on improving campaign performance. With Stensul, teams launch campaigns faster by streamlining the collaboration process and simplifying creation for all marketers, so they can create marketing assets that drive results. Stensul integrates with all leading ESPs/MAPs, including Marketo, Oracle Eloqua, Adobe Campaign, and Salesforce Marketing Cloud, as well as workflow platforms, image libraries, live content, link tracking, and messaging platforms. Top brands that trust Stensul to solve their most demanding email problems include AAA, BMW, Cisco, Demandbase, Equifax, Flywire, Greenhouse, Morgan Stanley, and Yahoo.

What you'll do

Coming on as an expert, you'll join one of our tight knit, cross functional Product Engineering teams, contributing to expanding the value that the Stensul platform offers to world class customers by implementing high quality solutions that meet the most demanding expectations. This gives you the unique ability to collaborate with Product, Design and QA experts to discover and solve for new market opportunities in an agile manner. You'll contribute to technical discussions and decisions that enable us to take our software development practices to the next level as well as serve as a coach & mentor to other developers. This role will initially start off remote due to COVID-19. Once the team returns to office, you will work in our Palermo office in Buenos Aires.

We're in a period of high growth which means we move fast, but you'll do so alongside smart,

driven individuals in a fun, collaborative environment with opportunities for growth. Our stack currently consists of PHP, MongoDB, Redis, Docker, Javascript (and Node.js), Vue.js, Go and Python to name a few. Learning Agile is one of our core values, which means that we are always identifying ways to make things better, and welcome new tools and languages that help us improve the way we work.

Specific responsibilities include:

Working with roughly defined requirements and using the product vision to elaborate and build effective solutions

Collaborating as part of a cross-functional team (Engineering, Product, Design, QA), helping achieve synergy, understanding our most demanding user needs and delivering features that exceed their expectations

Participating and contributing in architectural/system design discussions and decisions

Designing, implementing and maintaining improvements to the functionality of our platform

Writing high quality, standardized, concise and maintainable code

Tracking down and fixing bugs

Following our agile methodology and contributing to its improvement

Own and lead initiatives from inception to delivery and maintenance in an autonomous way

Proactively adding positive energy to our rapidly growing company

Helping, coaching and mentoring fellow team members in their day to day tasks and professional development, contributing to the team's learning & development

Who you are

Excellent Javascript programming skills

Excellent Frameworks/Libraries skills (Vue.js preferably, Angular, React)

Extensive knowledge of server-side oriented languages (PHP, python, golang, nodejs)

Knowledge of HTML5/CSS3 web application development

Experience using design patterns

Excellent OOP knowledge

Knowledge of web architectures, services and APIs concepts

Experience with version control (git, subversion)

Ability to work well in an agile and team environment, a true team player

Solid English communication skills both oral and written

Proficiency on quality practices such as unit test implementation

Strong testing skills and attention to detail

Strong interest in understanding our customers, our market and our product to bring new ideas to the table

You get bonus points for having:

Experience with Sass/LESS preprocessors, Webpack bundler and other Javascript related technologies

Experience with Typescript and/or other type checking technologies

Experience with high traffic sites

Experience with monitoring tools and metrics (New Relic, Datadog, Kibana)

Experience with container technologies (Docker, Kubernetes)

Experience with bug tracking tools like Jira, Redmine, Bugzilla, etc.

Experience with functional programming

Experience shipping products for enterprise companies

Experience with email layout coding

Experience with PHP frameworks (Laravel, Zend, Symfony);

Knowledge of relational and document oriented databases (MySQL, MongoDB)

A great sense of humor

What we offer

This position is based in our office in Buenos Aires, but we have flexible policies that allow for occasionally working remotely if needed

Competitive salary & benefits

Company laptop and phone reimbursement (if required)

When we are able to return to the office:

Endless availability of PlayStation 4 and table tennis competitors

Weekly team lunches (from asado to empanadas, there is something for everyone)

Great candy corner, with plenty of snacks, drinks, fruits, etc.

Regular after offices in a great area of the city (Palermo), where the office is located

Other awesome secret benefits we'll tell you once you are on the team

Being a part of an amazing, inclusive team that lives by our shared values and is committed to building the next phase of stensul
