

Senior Software Engineer

[Apply Now](#)

Company: Parcel Tracker

Location: Argentina

Category: computer-and-mathematical

Type: Full Time

Location: Remote

Salary: \$30,000-\$45,000/year

About Parcel Tracker

Parcel Tracker is leading the wave in next-generation logistics and parcel management software. We've rapidly grown from a bootstrapped start-up into a well-funded company logging over 5 Million parcels a year through our flagship product.

Our goal is to become a leader in everything parcels, be it for businesses or consumers.

Every parcel ordered should be tracked and logged through our systems!

Deepfinity is a dynamic and rapidly expanding small company. Fueled by a recent surge in sales, we are poised for further growth, requiring the expertise of a proficient backend developer to spearhead the management, development, and innovation of our backend infrastructure.

Get to know us better:

What you'll do

You will bring expertise to the backend team, working on the design and implementation of new features which require high scalability. You will also be involved in the development of integrations with our customers' systems and internal tools used by the support and sales

team.

Responsibilities:

- 1 . **Technical Leadership:** Lead the design and implementation of scalable .NET and SQL Server solutions, ensuring alignment with business objectives and best practices.
- 2 . **Collaborative Architecture** Work with cross-functional teams to define system architecture and design patterns, providing insights for robust, maintainable solutions.
- 3 . **Code Development and Review** Write clean, maintainable code and conduct code reviews to uphold quality standards. Mentor junior team members.
- 4 . **Performance Optimization** Identify and address performance bottlenecks, optimizing application scalability and responsiveness.
- 5 . **CI/CD Implementation** Establish and maintain CI/CD pipelines for automated build, test, and deployment processes.
- 6 . **Data Management** Design and optimize database structures and queries for efficient data storage and retrieval.
- 7 . **Monitoring and Maintenance** Monitor system health, implement logging and alerting mechanisms, and proactively address issues.
- 8 . **Documentation and Knowledge Sharing** Create technical documentation and facilitate knowledge sharing sessions to disseminate best practices.
- 9 . **Technology Evaluation** : Stay updated on emerging technologies, evaluate their potential adoption, and advocate for innovation.
10. **Customer-Centric Focus** Collaborate with stakeholders to gather feedback and deliver solutions that meet customer needs and drive business outcomes.

Requirements

- 1 . Proficient in .NET framework
- 2 . Strong command of SQL Server, including database design, optimization, and query performance tuning

- 3 . Extensive experience architecting scalable systems, demonstrating the ability to design robust, high-performance solutions that can handle increasing loads gracefully
- 4 . Familiarity with microservices architecture and containerization technologies like Docker and Kubernetes for building modular, scalable applications
- 5 . Deep understanding of data structures, algorithms, and their complexities, with the ability to choose the most appropriate ones for different scenarios

Preferred Qualifications:

- 1 . Proven experience in building CI/CD pipelines to automate software delivery processes and ensure continuous integration and deployment
- 2 . Solid understanding of full-text search mechanisms and technologies, enabling efficient information retrieval from large datasets
- 3 . Knowledge of distributed systems architecture and best practices for building fault-tolerant and resilient applications
- 4 . Familiarity with Terraform and Azure, leveraging infrastructure as code principles to provision and manage cloud resources efficiently

Non-Technical Competencies:

Ability to work autonomously and not too proud to ask for help

Proficient in English communication, both written and verbal, to effectively interact with team members and stakeholders

Capable of making informed, forward-thinking design decisions that consider long-term implications and scalability

Ownership of own work and reliable person

Availability for at least 5 hours of overlap with UK working hours (9 am-6 pm UTC), ensuring effective communication and coordination with the team

A Little About You:

You're a team player, trustworthy, and fun to be around

Enjoys learning and improving their skills

Can bring expertise and critical thinking to solve problems

Self-motivated

Listens and asks questions

Benefits

Fully Remote Work from anywhere in the world, all you need is a stable internet connection and a hunger to make things happen.

Paid Development & Training We're a team of special forces, we're always trying to better ourselves, and the Parcel Tracker is here to support your growth!

Innovation Culture Everything is fair game; every process, every technology, every notion can be challenged and improved! We want change makers!

Choose your workspace Choose your ideal workspace with our budget support—set up your home office or pick a coworking space that suits your style

Health and Fitness Programs You'll have a wellness budget for the gym and sports membership. The body is a reflection of the mind, let's stay healthy.

Unlimited Holidays Enjoy the freedom to take time off when you need it, no counting days. We trust you to manage your work and time off.
