Senior Software Engineer (.NET / Angular) – OP0997-01

Are you in Argentina, Brazil, Colombia, Chile, or Costa Rica? Join us as we actively recruit in these locations, offering a comfortable remote environment. Submit your CV in English, and we'll get back to you!We invite a Software Engineer with solid expertise in .NET and Angular technologies to join our team and contribute to the development of a brand-new project in the Point-of-Sale domain. You'll help plan and implement the integration of large products, where the goals are to bring the most value to the end user and offer new opportunities for clients.

What's in it for you:

Enhance your PoS systems expertise while contributing to a globally expanding project that is already widely present in the US, Canada, and EU markets

Work with complicated logic and modern tech stack (.NET Core and .NET Framework 4.7.2, REST API, Angular v13+)

Gain hands-on experience in cloud platforms and tools by working with the Azure ecosystem

Is that you?

3+ years' work experience with .NET

Hands-on experience with Angular, strong JavaScript and TypeScript skills

Experience with REST API, ASP.NET MVC

Good knowledge of relational DB concepts, MS SQL and SQL/T-SQL

Expertise in software application architecture and familiarity with common design patterns

Experience in working with distributed systems, availability, deployment

Solid OOP/OOD, Open API Specification, SOLID skills

Good familiarity with Agile methodologies, CI/CD pipeline tools and practices

Upper-Intermediate+ English level

Desirable:

Working experience with the Azure cloud platform and services

Knowledge of Point-of-Sale systems or related domains

Experience with SonarQube to measure and analyze code quality

Experience with Redis

Key responsibilities and your contribution

In this role, you will be responsible for developing new software features, supporting and maintaining the existing ones, and contributing to the overall quality of the product, so strong technical expertise, teamwork, communication, and quality assurance skills are necessary.

Understand the client's business domain and participate in planning sessions

Develop new product features and maintain existing functionalities

Identify and fix bugs while introducing improvements to enhance the overall quality of the product

Assess technical solutions and highlight potential technical risks

Collaborate on work decomposition and estimation

Follow the project SDLC and suggest improvements when necessary

Contribute to enhancing code quality through pull requests and self-review

Document technical solutions; improve CI/CD practices

Collaborate on design with Tech Lead and Principal Architect
