

Senior Software (.Net) Developer Argentina Software Engineering, .NET.

[Apply Now](#)

Company: Eleks

Location: Argentina

Category: computer-and-mathematical

ELEKS is looking for a Senior Software (.Net) Developer in Argentina.

ABOUT CLIENT

Our client is one of the most famous financial services and management consulting companies in the USA that provides various risk management solutions, such as commercial risk, investment, wealth, health, and reinsurance products.

ABOUT PROJECT

The main goal of the project is rethinking, redesigning, and revamping the comprehensive reinsuring trading portal.

REQUIREMENTS

5+ years of experience in C#, Web API

Experience with Azure AD/Entra ID/Okta

Experience with Dockers, Kubernetes

Experience with RDBMS (one of MS SQL)

Experience with VB

Experience with .Net Framework, MVC

Experience with ORMs: EF6

Experience with Unit Testing using XUnit / NUnit (Add for Middle pos)

Good knowledge of CI/CD system setup and configuration

Experience with creating templates (working with source generators etc.)

Upper-Intermediate High/Advanced level of English

RESPONSIBILITIES

Develop solutions and algorithms according to technical specifications or other requirements documentation; use standard algorithms in the applicable cases

Write program code according to the defined application architecture

Possess knowledge of software development methodologies (Waterfall, Agile, etc.)

Structure and format the source code, comment and mark up the code, and name variables, functions, classes, data structures, and files according to the company conventions and industry best practices

Implement code refactoring and optimization methods. Post-refactoring and optimization result in the collective knowledge base as the best practices

Modify existing software code and test its availability. Analyze software code compliance with readability and performance standards

Use version control systems to track code optimization progress and merge or split code entities. Commit changes according to version control rules

Perform analysis, verification, and debugging of the software code at the level of application units

Develop procedures to test code availability, collect diagnostic data, generate test data sets with desired characteristics, examine the required software characteristics, etc

Reproduce defects logged in the database, establish their causes, and modify code to eliminate defects

Determine software product compliance with the technical requirements

Collect and analyze results of software tests. Deliver correct interpretation of diagnostic data; analyze the significance of the obtained software characteristics; can document test results.

Assess software product availability

Develop, document, and edit programming interfaces, software modules and components assembling procedures, software deployment and update procedures, and data migration and transformation (conversion) procedures

Assemble software modules and components into software products; connect software products to the external environment. Test availability of software product versions

Analyze variants of software requirements implementation; evaluate their time consumption and workload. Conduct assessment and justification of the solutions recommended for software requirements implementation

Approve technical requirements for software with stakeholders. Evaluate and justify terms of task completion. Assign tasks to developers, and monitor task implementation. Provide training on the project

Have valid competence-related certifications

Participate in conducting internal staff testing (“matrix”), organization of lectures, seminars, developers’ talks, knowledge-sharing sessions, and other forms of trainings for developers

Participate in conducting external training (Academies) for students and staff from regional offices etc

What will you get with ELEKS

Close cooperation with a customer

Challenging tasks

Competence development

Team of professionals

Dynamic environment with a low level of bureaucracy
