Company: Satellogic

Location: Concepción del Uruguay

Category: computer-and-mathematical

### About Satellogic

Satellogic is a vertically integrated Earth Observation satellite and data company. We design, manufacture, and operate our own fleet of satellites, the Aleph-1 constellation, which delivers high-frequency, high-resolution imagery plus full-motion video.

Earth Observation imagery and data are key to monitoring change at scale, informing critical decisions, and ultimately helping solve the world's most pressing problems. Our mission is to democratize access to this information, making it affordable and available for those who need it across a wide range of industries, from climate monitoring and agriculture, to energy, infrastructure and many more. We want to do our part in building a world where every organization is prepared for the challenges of tomorrow.

With a growing team of more than 400 employees spanning 12 countries, Satellogic is a diverse group of purpose-driven professionals across software development, satellite engineering, operations, data science, manufacturing, and sales. We are excited to grow and welcome team members who push the limits, get things done, and never stop learning—all while being humble, honest, and empathetic

### About the team:

We are a dynamic and heterogeneous team of professionals, owning all aspects of the corporate infrastructure. This infrastructure supports critical systems performing a variety of missions including satellite operations, data processing, satellite manufacturing, as well as supporting employees and internal needs. We design, implement and monitor a wide range of systems and assets across the globe. We get things done and never stop learning.

About the position:

As a Senior Network Administrator, you will oversee a wide range of systems and network infrastructure, on-premise and on the cloud. You will be responsible for the network performance, routing, firewalling and interconnectivity among our locations and cloud infrastructure. You will design and implement key systems and services along with evangelizing on best practices among teams-wide efforts.

Responsibilities:

Support our network appliances, identifying, troubleshooting, and resolving incidents.

Collaborate with teams to evaluate systems performance and monitor production environments.

Perform discovery and requirements analysis for new network features, analysis of current network capabilities and limitations and design/engineer/integrate new system capabilities to meet requirements.

Create, use and maintain network technical documentation and network security plans.

Configuring and overseeing various aspects of the IT initiatives before deployment and coordinating with cross-functional teams including DevOps engineering and other operations teams

Perform scheduled patch management tasks and troubleshoot and resolve related issues/incidents.

Ensure the timely and smooth progress of network related projects are in line with timelines, budget, and requirements.

Define systems capacity planning for on-prem and cloud infrastructure.

Work in a fast paced environment with ambitious goals and passionate co-workers

Collaborate with helpdesk support tasks

The preferred location is Buenos Aires or Montevideo.

About you:

Experience:

5+ years of proven professional and technical experience as a network administrator in

heterogeneous environments.

Familiarity with infrastructure as code (terraform, AWS cloudformation, etc).

Familiarity with virtualization technologies (VMware) and cloud infrastructure.

Proficiency with Cloud and on-premise networking (Switching, VLANs, VPN, VPC, routing protocols).

Experience managing and configuring DNS systems (BIND)

Experience in Scripting (python, bash).

Skills:

Ability to prioritize issues and to quickly find solutions.

English proficiency, spoken and written required.

Capacity to learn continuously and passion for pushing the limits.

Diversity Commitment

Satellogic values diversity and inclusion and is an equal opportunity employer. We are convinced that hiring and developing top talent from around the world for any given discipline will drive innovation, generate new solutions, and deliver a superior product to our global customer base. We work to build an equitable and inclusive environment in which all people, regardless of gender, race, religion, or background, can come together to do their best work.

Please feel free to specify your pronouns following your name on the application.
