Company: RH Visión

Location: Argentina

Category: office-and-administrative-support

Job Summary:

In this role, you will collaborate with external agencies, brand representatives, and a cross-functional team in a fast-paced Agile environment, facilitating productive alignment conversations and delivering assets that enable teams to work quickly and efficiently. You will be familiar with every stage of the design and build process, from research and journey mapping to wireframing, prototyping, and delivering high-fidelity designs. You will have a strong vision for how a centralized design system can accelerate workflows and excellent communication, interaction, and visual design skills. Experience in retail, e-commerce, transactional, rewards, or loyalty programs and design systems is a plus. A passion for fantastic customer experience and empathy is a must.

Primary Skills: 7 to 9 years of experience designing for web and mobile, with a strong portfolio demonstrating your experience creating user-centered design solutions. Minimum of 3+ years of experience in ecommerce, loyalty, credit card/finance, or related field. Minimum of 3+ years of experience in responsive design and/or native mobile apps. Expert in Visual (UI) and Interaction Design (UX) - able to synthesize custom elements from an existing design system with native mobile patterns to deliver an effective combination of consistency, familiarity, brand expression, and ease of use. Comfortable reviewing proposed and implemented work, providing candid feedback to fellow designers and developers, holding the cross-functional team accountable to delivering the application as designed, or arriving at compromises that

keep the customer experience at the forefront. Experienced in gathering end-user input and conducting or participating in usability testing and needs-finding research. Detail-oriented with excellent work-file organization and respect for sustainable but evolving design processes. Excellent communicator who has the conviction to champion your point of view but can also successfully collaborate with others. Role and Responsibilities: Working largely independently lead the UX/UI design of 2-3 projects at a time by optimizing for usability, preference, and ease of adoption. Ensure designs and user interfaces communicate consistent, effective experiences and messages across all platforms/breakpoints while aligning with the core strategy. Advocate for and participate in user testing where appropriate, co-crafting the learning agenda with our research and product team. Facilitate workshops and design sprints with project teams and stakeholders to explore problem spaces, identify pain points, and create alignment; produce summarizing documents for executives share-out where necessary. Independently partner with product, engineering, and business partners to evaluate the right solution based on feasibility, impact, and budget. Escalate to your design manager when necessary, with solutions and recommendations for the path forward. Maintain a growth mindset, leveraging soft skills to give and receive feedback graciously and translate critique into a productive direction for the team to act upon.
