Company: GlobalLogic

Location: Buenos Aires

Category: other-general

We can help you build an exceptional career
SRE (Site reliability engineering) IRC215557 Job:
IRC215557 Location: Argentina - Buenos Aires Designation: Developer Experience 5-10 years
Function: Engineering Skills: Bash, Git, Python Work Model: Remote

Description: Requirements: Utilize proficiency in scripting languages such as Bash and Python to automate tasks and streamline operational processes. Implement and manage CI/CD tools like Jenkins and GitLab CI/CD to enable automated software deployment and integration. Maintain version control systems, particularly Git, and collaborate with cross-functional teams using collaboration platforms. Apply knowledge of infrastructure-as-code (IAC) principles and tools, including Ansible and Terraform, to manage and scale our infrastructure. Demonstrate strong problem-solving skills to troubleshoot complex issues efficiently. Leverage your background in system administration, infrastructure management, or software engineering to optimize our systems. Actively participate in incident response, post-incident analysis, and take preventive measures to ensure system stability and reliability. Implement observability tools, monitoring, and alerting systems to proactively identify and resolve potential issues. Strike a balance between ensuring system reliability and promoting continuous innovation and development.

Job Responsibilities: Proficiency in scripting languages, especially Bash and Python, for automation. Experience with CI/CD tools like Jenkins and GitLab CI/CD, and strong pipeline management skills. Familiarity with version control systems, particularly Git, and collaboration platforms. Knowledge of infrastructure-as-code (IAC) principles and tools, such as Ansible and Terraform. Strong problem-solving skills, a proactive approach to system health, and the ability to troubleshoot complex issues. A solid

background in system administration, infrastructure management, or software engineering. Experience in incident response, post-incident analysis, and implementing preventive measures. Familiarity with observability tools, monitoring, and alerting systems. A commitment to balancing reliability concerns with continuous innovation and development. What We Offer

Exciting Projects: Come take your place at the forefront of digital transformation! With clients across all industries and sectors, we offer an opportunity to work on market-defining products using the latest technologies.

Collaborative Environment: Expand your skills by collaborating with a diverse team of highly talented people in an open, laidback environment — or even abroad in one of our global centers or client facilities!

Work-Life Balance: GlobalLogic prioritizes work-life balance, which is why we offer flexible work schedules. We offer you the best quality of work life so that you exceed the expectations of our clients, while achieving your professional and personal ambitions.

Professional Development: Our dedicated Learning & Development team regularly organizes English classes, professional certifications, and technical and soft skill trainings. We also offer the chance to travel internationally.

Excellent Benefits: We provide our employees with competitive salaries, family medical insurance, extended paternity leave, annual performance bonuses, and referral bonuses.

About GlobalLogic GlobalLogic is a leader in digital engineering. We help brands across the globe design and build innovative products, platforms, and digital experiences for the modern world.
