## Technical Leader

[Apply Now](#)

Company: Rockwell Automation

Location: Buenos Aires

Category: other-general

At Sensia Global we have a new and exciting opportunity for a Field Engineer based in Argentina (preferred locations Neuquen City, Comodoro Revadavia City or Buenos Aires). The successful candidate will play a key role working in a dynamic team performing system engineering and field services for automation process control projects based on programmable controllers, HMI, drivers, motor control centers, operator/ field device, instrumentation, etc. Responsibilities: Designs low to moderate complexity architectures, and/or prepares studies and analyzes existing systems. This includes system design, system engineering, hardware engineering, programming, factory, and site testing. Identifies, analyzes, and recommends corrective actions to fix systems deficiencies. Attend to customer maintenance contracts, for predictive and corrective maintenance on equipment with Rockwell technology such as Logix systems, Powerflex drives, FTView, FTHistorian, industrial networks and others relevant technologies. Be a contributing part of a project team, with high flexibility to accommodate to changes and accept challenges. Multitasking profile which main activities will be to execute engineering, design, programming, testing, site services but also to support the sales team, contribute to proposals and be trained on the Sensia products portfolio to develop the O&G business in the region. Requirements: Experience in Rockwell Automation products. Be willing to travel to various locations. Able to work in Argentina without caveat. Oil and Gas Experience Preferred. Relevant Engineering Degree or Extensive work experience in a similar position. Experience with large complex projects. About Us: Sensia is the unification of sensing, intelligence and action. Sensia brings together the best of the best: the pioneering process automation, real-time control and IoT technologies of Rockwell

Automation, combined with the unmatched measurement and instrumentation, software and analytics capabilities of Schlumberger.Sensia is further strengthened by the oil and gas domain expertise and artificial lift experience shared by Rockwell Automation and Schlumberger.The result is Sensia—the leading automation specialist in oil & gas production, transportation and processing with a team of 1,000+ experts serving customers globally.
