Test Engineer – OP0990-01

Are you in Argentina, Brazil, Colombia, Chile, or Costa Rica? Join us as we actively recruit in these locations, offering a comfortable remote environment.We invite a talented Test Engineer with a solid background in manual testing and a keen interest in developing automation skills to join one of the two delivery teams under a brand-new sub-project for our client, an industry-leading payment processing solution provider offering merchant services to over 275,000 businesses in the US. Help us ensure and maintain the highest quality of innovative fintech products that bring value to hundreds of thousands of people.

What's in it for you:

Take an opportunity to develop knowledge and get hands-on with automation testing

Enhance your fintech knowledge and boost your technical expertise across various payment processing business areas

Advance your English skills through continuous communication with US-based teams, stakeholders, and the client

Is that you?

3+ years' experience in manual testing

Experience in automation testing with C# or any other programming language

Knowledge of Client-Server and web-based application structure

Solid experience in REST API testing (Postman)

Expertise with databases (MySQL, PostgreSQL, MongoDB)

Strong knowledge of test design techniques, testing levels, review, and testing requirements

Experience in creating test documentation (test cases, checklists, bug reports)

Upper-Intermediate English level

Desirable:
Experience with Azure or any other cloud provider

Key responsibilities and your contribution
In this role, your key responsibilities will include performing all sorts of manual tests. However, we also expect the candidate to gradually improve their knowledge of automated testing and develop practical skills in this area, so a strong desire to learn AQA activities is a must.

Ensure product quality and consistent delivery

Create and maintain all related test documentation

Perform various types of testing to confirm product compliance with the requirements

Collaborate with US-based product and engineering Scrum teams

Work together with the team on defining, estimating, and delivering scope on time
